Introduction

The Human Early Learning Partnership (HELP) is a collaborative, interdisciplinary research network, based at the School of Population and Public Health at the University of British Columbia. HELP’s unique partnership weaves many scientific viewpoints to address complex early child development (ECD) issues. HELP connects researchers and practitioners from communities and institutions across B.C., Canada, and internationally. HELP’s interdisciplinary approach reaches from ‘cell to society’ and its program of research emphasizes the human development spectrum.

This third edition of our annual research publications catalogue demonstrates the breadth and depth of our organization’s engagement in research and scholarship. HELP faculty members are committed to the integration of research and teaching and they work with a network of researchers and students from British Columbia, Canada and around the world to inform, engage, and facilitate action to ultimately help children and families thrive.

This catalogue highlights scholarly activities and achievements in 2014-2015 of the HELP team, affiliated scholars and researchers. It is organized by topic and is designed to allow readers to identify more easily the contribution of HELP to collective child development research. Publications listed cover a variety of disciplines and topics and, in many instances, reflect new and interesting collaborations across disciplines. This catalogue should help inform our communities, government and colleagues about the research undertaken through HELP. If you wish to seek further information about HELP research or activities, I invite you to contact our Deputy Director, Pippa Rowcliffe, or our faculty directly.
