# SCHOOL DISTRICT & COMMUNITY REPORT

HUMAN  
EARLY LEARNING  
PARTNERSHIP

2019/2020

# ACKNOWLEDGEMENTS

We express our deep gratitude to the x̱m̱əθ̱ḵʷəy̱əm (Musqueam) Nation for the privilege of working on their traditional, ancestral and unceded territory at the Point Grey Campus of the University of British Columbia.

The Middle Years Development Instrument (MDI) project is made possible with funding from BC school districts and school boards across the country. We would like to thank and acknowledge all participating school districts for their support of and collaboration towards this project.

We are grateful to the teachers, education staff and school administrators who work directly with us to gather and use our reports. This includes a commitment to training and completing questionnaires, engaging with students, parents and caregivers and using HELP's data and research in schools, districts and communities. We also extend our warmest appreciation to the students who take the time to share their experiences with us. Thank you.

We would also like to acknowledge the United Way of the Lower Mainland, the Max Bell Foundation and the McConnell Foundation for their contributions and continued support towards the MDI research project.

HELP would like to acknowledge the exceptional support we have received since 2001 from the Ministries of Children and Family Development, Education and Health. This investment has enabled the expansion of HELP's unique child development monitoring system that supports high quality, evidence-informed decisions on behalf of children and their families.

## DR. KIMBERLY SCHONERT-REICHL

HELP's Middle Years research is led by Dr. Kimberly Schonert-Reichl. HELP acknowledges Dr. Schonert-Reichl for her leadership and expertise in social and emotional development research, her dedication to exploring children's experiences in the middle years and for raising the profile of children's voices, locally and internationally.

# ABOUT THE HUMAN EARLY LEARNING PARTNERSHIP

The Human Early Learning Partnership (HELP) is an interdisciplinary research institute based at the School of Population and Public Health, Faculty of Medicine, at the University of British Columbia. HELP's unique partnership brings together researchers and practitioners from across BC, Canada and internationally to address complex child development issues. HELP's research projects explore how different environments and experiences contribute to health and social inequities in children's development over their life course.

The institute was founded by Drs. Clyde Hertzman and Hillel Goelman in 1999. Clyde's vision for HELP was to advance knowledge about child development and importantly, to apply this knowledge in communities. This report, and the work of HELP over two decades, would not have been possible without his vision and passion.

To learn more please visit our website at [earlylearning.ubc.ca](http://earlylearning.ubc.ca) (<http://earlylearning.ubc.ca/>).

# INTRODUCTION TO THE MDI

## WHY THE MIDDLE YEARS MATTER

Experiences in the middle years, especially between the ages of 10 to 13, have critical and long lasting effects. They are powerful predictors of adolescent adjustment and future success. During this time, children are experiencing significant cognitive, social and emotional changes that establish their lifelong identity and set the stage for adolescence and adulthood. The overall health and well-being of children in their middle years affects their ability to concentrate and learn, develop and maintain friendships and make thoughtful decisions.

During the late middle childhood years (also referred to as early adolescence), children have an increased awareness of themselves and others. During middle childhood they are developing ideas about how they may or may not "fit in" to their social and academic environments (Rubin et al., 2006). These ideas have the power to either promote health and academic achievement or lead to negative outcomes such as depression and anxiety in adulthood (Jacobs et al., 2008). Although middle childhood is a time of risk, it is also a time of opportunity. There is mounting evidence to suggest that positive relationships to adults and peers during this critical time act to increase a child's resiliency and school and life success.

## WHAT IS THE MIDDLE YEARS DEVELOPMENT INSTRUMENT?

The Middle Years Development Instrument (MDI) is a self-report questionnaire that asks children in Grade 4 and Grade 7 about their thoughts, feelings and experiences in school and in the community. It is a unique and comprehensive questionnaire that helps us gain a deeper understanding of how children are doing at this stage in their lives. Researchers working at the Human Early Learning Partnership (HELP) are using results to learn more about children's social-emotional health and well-being. In addition, the MDI is being used across sectors to support collaboration and inform policy and practice.

The MDI uses a strengths-based approach to assess five areas of development that are strongly linked to well-being, health and academic achievement. In addition, the MDI focuses on highlighting the promotive and protective factors and assets that are known to support and optimize development in middle childhood. These areas are: *Social and Emotional Development*, *Physical Health and Well-Being*, *Connectedness*, *Use of After-School Time* and *School Experiences*. Each of these dimensions is made up of several measures. Each measure is made up of one or more individual questions.

Combining select measures from the MDI helps us paint a more comprehensive portrait of children's overall well-being and the assets that contribute to their healthy development. The results for key MDI measures are summarized by two indices: The Well-Being Index and the Assets Index.

The following illustrates the relationship between MDI dimensions and measures, and highlights which measures contribute to the Well-Being and Assets Indices.

- A measure in the Well-Being Index
- A measure in the Assets Index
- \* A measure in the Grade 7 MDI only

For more information on all of the measures, including questions, response options and scoring for the MDI results found in this report, please refer to the [MDI Technical Guide \(https://bit.ly/mdi-technical-guide-v1\)](https://bit.ly/mdi-technical-guide-v1). For additional resources visit, the [Discover MDI Field Guide \(http://www.discovermdi.ca\)](http://www.discovermdi.ca).

## CONNECTING THE MDI WITH THE PERSONAL AND SOCIAL COMPETENCIES OF THE BC CURRICULUM

Your MDI data provide a unique approach to understanding children's social and emotional development and well-being in relation to the [BC Ministry of Education's Personal and Social Competencies](http://curriculum.gov.bc.ca/competencies) (<http://curriculum.gov.bc.ca/competencies>).

Areas measured by the MDI reflect facets of the "Personal and Social Competency" domain of BC's Redesigned Curriculum, providing valuable information for understanding children's growth and progress within this core competency. The MDI questions provide an opportunity for students to self-assess and reflect on their social and personal competency, including reflecting on MDI concepts, questions and results.

### PERSONAL & SOCIAL COMPETENCIES

#### Positive Personal & Cultural Identity

##### Related MDI Measures:

- Connectedness to Adults at Home, School and Community
- Peer Belonging
- Friendship Intimacy
- Empathy
- School Belonging
- School Climate
- Self-Esteem
- Academic Self-Concept
- Importance of Grades
- Friends & Learning
- Self-Awareness
- Perseverance
- Responsible Decision-Making

#### Personal Awareness & Responsibility

##### Related MDI Measures:

- Academic Self-Concept
- Self-Esteem
- Self-Regulation
- General Health
- Optimism
- Self-Awareness
- Perseverance
- Responsible Decision-Making
- Assertiveness
- Use of After-School Time

#### Social Responsibility

##### Related MDI Measures:

- Citizenship and Social Responsibility
- Prosocial Behaviour
- Empathy
- School Climate
- Connectedness to Adults at School
- Connectedness to Peers
- Self-Regulation
- Assertiveness

# ABOUT THIS REPORT

## Important Message About 2019-2020 MDI Result

In 2018-2019, MDI data collection was moved from November to January/February in response to requests from MDI school districts, and this may have had an influence on a range of MDI measures. Please don't hesitate to contact the MDI team at [mdi@help.ubc.ca](mailto:mdi@help.ubc.ca) if you have any questions about your MDI results.

## HOW THE RESULTS ARE REPORTED

School district data in this report includes all children who participated within the public school district in 2019/2020. School district data is compared to the **average for all districts**, which includes children from all participating public school districts and any independent schools.

Districts with large populations contribute more in computing the **average for all districts** than districts with smaller populations. Results for large districts tend to be closer to the average for all districts. Please see the table below for a list of participating districts, and note that the average is based on participating districts and **does not** represent all school districts in the entire province.

Where school districts or neighbourhoods contain fewer than 35 children, the results are suppressed. The data in this report have been rounded. Many questions on the MDI allow children to provide multiple responses. Totals for some measures and questions may not equal 100%.

#	School District	# of Children	Participation Rate
5	Southeast Kootenay	380	84%
10	Arrow Lakes	26	59%
19	Revelstoke	66	92%
23	Central Okanagan	1,513	84%
28	Quesnel	175	72%
33	Chilliwack	932	87%
34	Abbotsford	1,315	89%
37	Delta	863	69%
40	New Westminster	447	87%
42	Maple Ridge-Pitt Meadows	1,032	91%
43	Coquitlam	2,214	86%
46	Sunshine Coast	191	80%
49	Central Coast	10	77%
50	Haida Gwaii	28	82%
51	Boundary	104	95%
52	Prince Rupert	106	75%
53	Okanagan Similkameen	158	89%
60	Peace River North	397	80%
67	Okanagan Skaha	401	88%

#	School District	# of Children	Participation Rate

# 2019/2020 RESULTS FOR OKANAGAN SKAHA

## DEMOGRAPHICS

Population		Gender Identity	
Total Sample	401	Boys	53%
Participation Rate	88%	Girls	45%
		In Another Way	4%

### A note on how we are asking about gender identity

In the 2017/18 school year, for the first time, children were able to describe *themselves* through choices that included: "boy," "girl" or "in another way."

Following a review of the responses, this question was refined in the 2018/19 school year to instruct children to describe their *gender* as "boy," "girl" or, if they see themselves "in another way," to describe their gender using their own words. This question may continue to evolve.

### Languages Spoken at Home

First Nations, Inuit or Métis	0%	Mandarin	0%
Cantonese	0%	Punjabi	1%
English	98%	Spanish	1%
French	6%	Filipino/Tagalog	1%
Hindi	1%	Vietnamese	0%
Japanese	1%	Other	6%
Korean	1%		

**Total Sample:** Refers to the total number (#) of children represented in this report. Children are included in the sample if they complete a question and the data are reported.

**Participation Rate:** Refers to the percentage of the Grade 7 population that participated in the MDI survey this year.

**Gender Identity:** Children are asked to describe themselves as "Boy," "Girl" or "In another way." Children may choose not to answer the question at all. Children are able to select more than one response and therefore, in some cases, percentages may not add to 100%. Data are suppressed where fewer than 5 children selected the response.

**Languages Spoken at Home:** Children are able to select more than one language spoken at home.

**First Nations, Inuit or Métis Languages:** If a child selects "First Nations, Inuit or Métis" as a language spoken in the home, they are then asked to identify, if possible, the specific language. First Nations, Inuit or Métis language data are not publicly available.

**Other:** A limited selection of languages is offered on the MDI questionnaire. The "Other" category gives children an opportunity to enter their own response(s).

# WELL-BEING & ASSETS INDICES

Combining select measures from the MDI helps us paint a more comprehensive portrait of children's overall well-being and the assets that contribute to their healthy development. The results for key MDI measures are summarized by two indices. This section of the report focuses on results for the Well-Being Index and the Assets Index. Learn more about the important relationship between individual measures, the well-being index and the assets index in the [Discover MDI Field Guide \(http://www.discovermdi.ca/understanding-the-mdi/mdi-data/data-primer/\)](http://www.discovermdi.ca/understanding-the-mdi/mdi-data/data-primer/).

## WELL-BEING INDEX

The Well-Being Index combines MDI measures relating to children's physical health and social and emotional development that are of critical importance during the middle years. These are: Optimism, Happiness, Self-Esteem, Absence of Sadness and General Health.

Scores from these five measures are combined and reported by three categories of well-being, providing a holistic summary of children's mental and physical health.

### MEASURES

Optimism  
Happiness  
Self-Esteem  
Absence of Sadness  
General Health

#### High Well-Being (Thriving)

Children who score in the high range on at least 4 of the 5 measures of well-being and have no low-range scores.

#### Medium Well-Being

Children who score in the high range on fewer than 4 of the 5 measures of well-being, and have no low-range scores.

#### Low Well-Being

Children who score in the low range on at least 1 of the 5 measures of well-being.

### OKANAGAN SKAHA

### ALL PARTICIPATING DISTRICTS

## ASSETS INDEX

The Assets Index combines MDI measures that highlight four key assets that help to promote children's positive development and well-being. Assets are positive experiences, relationships or behaviours present in children's lives. Assets are considered actionable, meaning that schools and communities can focus their efforts in these areas to create the conditions and contexts where children can thrive.

Note: School Experiences are also considered to be an asset that contribute to children's well-being; however, this asset is not reported as part of the Assets Index to prevent the ranking of individual schools or sites. Please refer to the School Climate and Bullying and Victimization measures for data related to this asset.

# SOCIAL & EMOTIONAL DEVELOPMENT

The development of social and emotional skills, including empathy, optimism and self-esteem, are important for supporting positive mental health during middle childhood and at all ages to follow. These skills help children understand and manage their emotions, build and maintain positive relationships, and regulate their own behaviour. Opportunities to develop social and emotional skills can be created in many supportive environments: at school with teachers and peers, in the home with elders, family or caregivers and during after-school programs with community members.

Detailed information on the MDI survey questions and response scales for Social and Emotional Development are available in the [Discover MDI Field Guide \(http://discovermdi.ca/making-sense/social-emotional-development\)](http://discovermdi.ca/making-sense/social-emotional-development).

## RESULTS FOR OKANAGAN SKAHA

| Average for all Districts

### OPTIMISM

Optimism refers to the mindset of having positive expectations for the future. e.g., "I have more good times than bad times."

### EMPATHY

Empathy is the experience of understanding and sharing the feelings of others. e.g., "I care about the feelings of others."

### PROSOCIAL BEHAVIOUR

Prosocial behaviour refers to actions that benefit others. e.g., "I helped someone who was hurt."

### SELF-ESTEEM

Self-esteem refers to a person's sense of self-worth. e.g., "A lot of things about me are good."

### HAPPINESS

Happiness refers to how content or satisfied children are with their lives. e.g., "I am happy with my life."

### ABSENCE OF SADNESS

Sadness measures the beginning symptoms of depression. e.g., "I feel unhappy a lot of the time."

## ABSENCE OF WORRIES

Worries measure the beginning symptoms of anxiety. e.g., "I worry a lot that other people might not like me."

## SELF-REGULATION (LONG-TERM)

Long-term self-regulation requires adapting present behaviour to achieve a goal in the future. e.g., "If something isn't going according to my plans, I change my actions to try and reach my goal."

## SELF-REGULATION (SHORT-TERM)

Short-term self-regulation is about impulse control. It requires adapting behaviour or emotions to meet an immediate goal. e.g., "I can calm myself down when I'm excited or upset."

## RESPONSIBLE DECISION-MAKING

Responsible decision-making is about understanding the consequences of one's actions and making good choices about personal behaviour. e.g., "When I make a decision, I think about what might happen afterward."

## SELF-AWARENESS

Self-awareness is the ability to recognize one's emotions and thoughts while understanding their influence on behaviour. e.g., "When I'm upset, I notice how I am feeling before I take action."

## PERSEVERANCE

Perseverance refers to determination. It means putting in persistent effort to achieve goals, even in the face of setbacks. e.g., "Once I make a plan to get something done, I stick to it."

## ASSERTIVENESS

Assertiveness means communicating a personal point of view. It includes the ability to stand up for oneself. e.g., "If I disagree with a friend, I tell them."

## CITIZENSHIP AND SOCIAL RESPONSIBILITY

I believe I can make a difference in the world		I try to make the world a better place	
Disagree a lot	10%	Disagree a lot	3%
Disagree a little	10%	Disagree a little	7%
Don't agree or disagree	24%	Don't agree or disagree	22%
Agree a little	33%	Agree a little	38%
Agree a lot	22%	Agree a lot	29%

### RESEARCH HIGHLIGHTS

#### SOCIAL AND EMOTIONAL DEVELOPMENT

*Social and emotional competencies include children's ability to recognize, understand, and effectively respond to emotions, manage stress and be optimistic. They also include showing concern for others, sustaining healthy relationships and making effective personal and social decisions (Weissberg, Durlak, Domitrovitch, & Gullota, 2015).*

*Middle childhood is an important time for promoting self-regulation and problem-solving strategies to help children persevere in the face of obstacles and setbacks. Related skills and strategies learned during middle childhood tend to stick with children throughout the rest of their lives (Skinner et al., 2016).*

*A Vancouver-based study asked Grade 10 children to volunteer 1-1.5 hours per week with elementary school children. After 10 weeks researchers found participants had significantly decreased their risk for cardiovascular disease. The greatest health benefits were seen in adolescents who displayed the highest self-report measures of empathy (Schreier, Schonert-Reichl, & Chen, 2013).*

## PHYSICAL HEALTH & WELL-BEING

Promoting children's physical health and well-being in the middle years lays the foundation for a healthy life. Children who report feeling healthy are more likely to be engaged in school, have a feeling of connectedness with their teachers and are less likely to be bullied or bully others. Children benefit from guidance and opportunities that support the development of healthy habits, which they can carry forward into adolescence and adulthood. These habits include regular physical activity, quality sleep and healthy, social meals.

Detailed information on the MDI survey questions and response scales for Physical Health and Well-Being are available in the [Discover MDI Field Guide](http://www.discovermdi.ca/understanding-the-mdi/dimensions/physical-health-well-being) (<http://www.discovermdi.ca/understanding-the-mdi/dimensions/physical-health-well-being>).

### RESULTS FOR OKANAGAN SKAHA

| Average for all Districts

#### GENERAL HEALTH

Children are asked, "In general, how would you describe your health?"

#### EATING BREAKFAST

Children are asked, "How often do you eat breakfast?"

#### MEALS AT HOME WITH YOUR FAMILY

Children are asked, "How often do your parents or other adult family members eat meals with you?"

#### FREQUENCY OF GOOD SLEEP

Children are asked, "How often do you get a good night's sleep?"

#### WHAT TIME DO YOU USUALLY GO TO BED DURING THE WEEKDAYS?

## HOW OFTEN DO YOU EAT FOOD LIKE POP, CANDY, POTATO CHIPS, OR SOMETHING ELSE?

## WHO WOULD YOU TALK TO IF YOU WERE FEELING SAD, STRESSED, OR WORRIED?

Examples provided include a teacher, school counselor, parent, grandparent, older sibling or cousin, elder, after-school program staff, doctor, nurse etc. (Children can select all of the options that apply; therefore, percentages may not total 100%.)

An adult at school	21%
A family member	72%
An adult in my community	9%
A health professional	18%
My friend(s)	64%
Don't know who to talk to	7%
Prefer to handle it on my own	29%
Talk to someone else (someone not on this list)	4%

## TRANSPORTATION TO AND FROM SCHOOL

Children are asked, “How do you usually get to school?”; “How do you usually get home from school?” and “If you could choose, how would you wish to get to and from school?”

	To School	From School	Wish
Car	50%	38%	45%
School bus	20%	23%	11%
Public transportation (public bus, train or ferry)	2%	4%	3%
Walk	21%	30%	22%
Cycle, skateboard, scooter or rollerblade	4%	4%	14%
Something else	2%	2%	6%

### RESEARCH HIGHLIGHTS

#### PHYSICAL HEALTH & WELL-BEING

*Eating meals together as a family often is related to increased self-esteem and school success, and decreased chance of eating disorders, substance abuse, violent behaviour and symptoms of depression (Harrison et al., 2015).*

*Children ages 5 to 13 need 9–11 hours of uninterrupted sleep a night (Hirshkowitz et al., 2015). When children do not get enough sleep they are more likely to have troubles at school, be involved in family disagreements and display symptoms of depression (Smaldone, Honig, & Byrne, 2007).*

*Because of changes in the brain that take place around the time of puberty, children are more strongly attracted to junk foods that contain high amounts of fat and sugar than adults (Reichelt, 2016).*

Strong and supportive social connections play an important role in children's healthy development. Close relationships and a sense of belonging with adults and peers at home, in school and in the community, can promote positive mental health and minimize risks that may be present in children's lives.

Having one adult, such as a parent or auntie, an elder or a coach, who cares about them, listens to them and believes in them can make a powerful difference in a child's life. For children, connectedness to extended family, community, as well as land, language and culture also play an important role in encouraging a strong and healthy sense of identity.

Detailed information on the MDI survey questions and response scales for Connectedness is available in the [Discover MDI Field Guide](http://discovermdi.ca/making-sense/connectedness) (<http://discovermdi.ca/making-sense/connectedness>).

## RESULTS FOR OKANAGAN SKAHA

| Average for all Districts

### CONNECTEDNESS WITH ADULTS

#### ADULTS AT SCHOOL

Assesses the quality of relationships children have with the adults they interact with at school. e.g., "At my school there is an adult who believes I will be a success."

#### ADULTS IN THE NEIGHBOURHOOD/COMMUNITY

Assesses the quality of relationships children have with the adults they interact with in their neighbourhood or community. e.g., "In my neighbourhood/community there is an adult who really cares about me."

#### ADULTS AT HOME

Assesses the quality of relationships children have with the adults in their home. e.g., "In my home there is a parent or other adult who listens to me when I have something to say."

## NUMBER OF IMPORTANT ADULTS AT SCHOOL

41%

In 2018-2019, the 'Number of Important Adults at School' question appeared differently on the online questionnaire as compared to previous years and the current reports (2019-2020). We caution direct comparisons of the 2018-2019 'Number of Important Adults at School' question to previous years and to this report. We recommend you read our [Data Highlights and Trends 2019-2020 report](https://bit.ly/2019-20-mdi-data-trends) (<https://bit.ly/2019-20-mdi-data-trends>) for more information as you interpret the 'Number of Important Adults at School' data this year.

## WHAT MAKES AN ADULT IMPORTANT TO YOU?

(Children can select all the options that apply)

	At School	At Home
This person teaches me how to do things that I don't know.	67%	75%
I can share personal things and private feelings with this person.	35%	75%
This person likes me the way I am.	60%	83%
This person encourages me to pursue my goals and future plans.	57%	81%
I get to do a lot of fun things with this person or because of this person.	45%	81%
The person is like who I want to be when I am an adult.	20%	45%
The person is always fair to me and others.	56%	65%
The person stands up for me and others when we need it.	33%	63%
The person lets me make decisions for myself.	51%	69%

## CONNECTEDNESS WITH PEERS

### PEER BELONGING

Measures children's feelings of belonging to a social group. e.g., "When I am with other kids my age, I feel I belong."

### FRIENDSHIP INTIMACY

Assesses the quality of relationships children have with their peers. e.g., "I have a friend I can tell everything to."

## RESEARCH HIGHLIGHTS

### CONNECTEDNESS

*Children who do not feel part of a group or feel cast out by their own group are at risk of anxiety and depression. They are also at higher risk of low school attendance and future school drop-out (Veiga et al., 2014).*

*Social competencies and friendship-building skills can buffer children against bullying, anxiety and depression (Guhn et al., 2013).*

*Strong social connections in adolescence are a better predictor of well-being in adulthood than their academic achievement (Olsson, 2013).*

*For younger students during elementary and middle school years, a nurturing and caring relationship with a classroom teacher is vital. Connections with warm and accepting teachers enhance emotional well-being, increase motivation, engagement and success in school for children in early adolescence. They are also buffers for children who are experiencing mental health problems (Oberle, 2018).*

# USE OF AFTER-SCHOOL TIME

Participation in activities after school provides important developmental experiences for children in their middle years. These activities create a variety of opportunities for children to build relationship skills and gain competencies. Research has consistently found that children who are engaged in after-school activities are more likely to experience greater academic and social success.

Detailed information on the MDI survey questions and response scales for Use of After-School Time is available in the [Discover MDI Field Guide \(http://discovermdi.ca/making-sense/after-school-time\)](http://discovermdi.ca/making-sense/after-school-time).

## RESULTS FOR OKANAGAN SKAHA

| Average for all Districts

### AFTER-SCHOOL ACTIVITIES

Children were asked, "During the last week after school (from 3 pm - 6 pm), how many days did you participate in?":

#### ANY ORGANIZED ACTIVITY

Children who participated in any after-school activity that was structured and supervised by an adult (e.g., educational lessons, youth organizations, music or art lessons and sports practice).

#### EDUCATIONAL LESSONS OR ACTIVITIES

For example: Tutoring, attending a math school, foreign language lessons, or some other academic related activity.

#### MUSIC OR ART LESSONS

For example: Drawing or painting classes, musical instrument lessons or some other activity related to music or art.

#### YOUTH ORGANIZATIONS

For example: Scouts, Girl Guides, Boys and Girls Clubs, or some other group organization.

#### INDIVIDUAL SPORTS (WITH A COACH OR INSTRUCTOR)

For example: Swimming, dance, gymnastics, ice skating, tennis or another individual sport.

#### TEAM SPORTS (WITH A COACH OR INSTRUCTOR)

For example: Basketball, hockey, soccer, football, or another team sport.

## HOW CHILDREN SPEND THEIR TIME

Children were asked how they spend their time during the after-school hours of 3 pm - 6 pm:

Percentage of children who reported:

### COMPUTER USE & TV

#### VIDEO OR COMPUTER GAMES

#### WATCH TV, NETFLIX, YOUTUBE OR SOMETHING ELSE

### SOCIALIZING WITH FRIENDS

#### HANG OUT WITH FRIENDS

#### USE A PHONE OR INTERNET TO TEXT OR CHAT WITH FRIENDS

### READING & HOMEWORK

#### READ FOR FUN

#### DO HOMEWORK

### ARTS & MUSIC

#### ARTS & CRAFTS

#### PRACTICE A MUSICAL INSTRUMENT

### SPORTS

#### PLAY SPORTS OR EXERCISE FOR FUN

WORKING & VOLUNTEERING

VOLUNTEER

WORK AT A JOB

## WHAT CHILDREN WISH TO BE DOING

Children were asked what they want to be doing during the after-school hours of 3 pm - 6 pm:

**I am already doing the activities I want to be doing**

**77%**

**I wish I could do additional activities**

**28%**

**I am doing some of the activities I want, but I wish I could do more**

**5%**

Children who answered that they wish to be doing additional activities were asked to identify one activity they wish they could do and where they would like to do it. Note: responses are grouped into categories for reporting purposes.

### WISHES

(Number of Children)

Computer/Video Games/TV	4
Friends and playing	17
Physical and/or outdoor activities	50
Music and arts	18
Time with family at home	15
Work related activities/volunteering	9
Free time/relaxing	1
Learning new things	1
Other	2

### WHERE WOULD YOU LIKE THIS ACTIVITY TO BE?

(Number of Children)

Community Centre	25
Home	35
Park or Playground	14
School	17
Other	49

## PERCEIVED BARRIERS TO PARTICIPATING IN DESIRED AFTER-SCHOOL ACTIVITIES

Children were asked what prevents them from doing the activities they wish to be doing after school (3 pm - 6 pm):

(Number of Children)

I have no barriers	181
I have to go straight home after school	58
I am too busy	72
It costs too much	50
The schedule does not fit the times I can attend	78
My parents do not approve	21
I don't know what's available	36
I need to take care of siblings or do things at home	17
It is too difficult to get there	42
None of my friends are interested or want to go	56
The activity that I want is not offered	47
I have too much homework to do	34
I am afraid I will not be good enough in that activity	48
It is not safe for me to go	4
Other	48

## AFTER-SCHOOL PEOPLE AND PLACES

### WHERE DO YOU GO AFTER SCHOOL? (FROM 3 PM - 6 PM)

	Never	1x /week	2x +/week
Home	2%	4%	94%

## RESEARCH HIGHLIGHTS

### USE OF AFTER-SCHOOL TIME

*Participation in after-school programs can result in greater connectedness to school and success in school as well as decreased negative behaviours (Durlak et al., 2010).*

*Quiet reflection time and daydreaming is just as essential to brain health and development as active and focused activities (Immordino-Yang, 2012).*

*Children who demonstrate a lack of self-control and problem solving skills may experience the greatest benefit from activities such as music, arts and sports that help to develop these skills (Diamond, 2014).*

*A study examining the experiences of children in Grades 1–5 who participated in after-school programs found that children who participated in high-quality, structured after-school programs had increased social-emotional skills, in addition to fewer conduct problems and higher social self-control and assertion (Wade, 2015).*

*Challenging and enjoyable after-school activities can improve youth's ability to reason and problem solve, exercise choice and discipline and be creative and flexible, which are strong predictors of academic, career, and life success (Diamond, 2014).*

## SCHOOL EXPERIENCES

Children's school experiences are important for their personal well-being and academic success. When children have positive experiences at school they are more likely to believe they have a valued role in the school, feel more engaged in class and achieve higher academic performance. Understanding children's school experiences improves our ability to cultivate school environments that are safe, caring and supportive.

Detailed information on the MDI survey questions and response scales for School Experiences are available in the [Discover MDI Field Guide \(http://discovermdi.ca/making-sense/school-experiences\)](http://discovermdi.ca/making-sense/school-experiences).

### RESULTS FOR OKANAGAN SKAHA

| Average for all Districts

#### ACADEMIC SELF CONCEPT

Children's beliefs about their academic ability, including their perceptions of themselves as students and how interested and confident they feel in school. e.g., "I am certain I can learn the skills taught in school this year."

#### SCHOOL CLIMATE

The overall tone of the school environment, including the way teachers and students interact and how students treat each other. e.g., "People care about each other in this school."

#### SCHOOL BELONGING

School belonging is the degree to which children feel connected and valued at their school. e.g., "I feel like I am important to this school."

Percentage of children who feel it is **very important** to:

60%  
make friends

72%  
get good grades

55%  
learn new things

I plan to graduate from high school.

98% 2%

Yes No

Percentage of children who **agree a little** or **agree a lot** that:

When I grow up, I have goals and plans for the future.

79%

I feel I have important things to do in the future.

81%

I plan to graduate from college, university, or some other training after high school.

91% 9%

Yes No

## VICTIMIZATION AND BULLYING AT SCHOOL

Children are asked: "During this school year, how often have you been bullied by other students in the following ways?":

### CYBER

### PHYSICAL

### SOCIAL

### VERBAL

### RESEARCH HIGHLIGHTS SCHOOL EXPERIENCES

Children's perception of kindness within a school is a consistent indicator of a positive school climate. Students who see kind behaviours in students, teachers and staff also describe their school environments as being safe and encouraging places to learn. As children transition from Grade 4 to Grade 8, perceptions of kindness in schools decrease (Binfet, Gadermann & Schonert-Reichl, 2016).

Feelings of belonging are associated with lower emotional distress, the reduction of negative behaviours (such as bullying and mental health issues) and are associated to rates of higher resilience later in life (van Harmelen et al., 2016).

Children and youth who demonstrate empathy are less likely to bully others and are more likely to defend against bullying. Research shows that specific empathy skills differ between those who bully, are victimized, defend or are bystanders. Focusing on developing children's understanding of what others feel results both in less bullying and more defending behaviours (van Noorden et al, 2015).

# MOVING TO ACTION WITH DISCOVERMDI.CA

MDI data can support planning, foster collaboration and inform action across schools, organizations and communities. There are many opportunities for working with your MDI results and there are examples of successful initiatives from across the province to learn from.

We encourage you to take time to visit **Discover MDI: A Field Guide to Well-Being in Middle Childhood** at [discovermdi.ca](http://discovermdi.ca), an online resource where you can access information and research on the many aspects of well-being in middle childhood, resources and tools for understanding and sharing MDI data and to connect with MDI Champions who are working on similar issues in their schools and communities. Here are some key resources and tools to get you started:

## UNDERSTAND YOUR MDI DATA

MDI reports provide information with both detail and depth into the social and emotional lives of children. Approach the results with a lens of curiosity, inquiry and appreciation. The Discover MDI Field Guide can walk you through [how to read and interpret your MDI data](http://www.discovermdi.ca/understanding-the-mdi/md-data/) (<http://www.discovermdi.ca/understanding-the-mdi/md-data/>). It also provides background research to support further understanding of the MDI data.

## CHOOSING A FOCUS: THINK BIG, START SMALL

It may be overwhelming to consider the many opportunities for change presented in the MDI data. Where will your focus be? What results do you have some influence over? How will you make change? For example, if you are interested in the area of social and emotional development, the Discover MDI Field Guide provides in-depth information on the [MDI and its dimensions and measures](http://www.discovermdi.ca/understanding-the-mdi/dimensions/) (<http://www.discovermdi.ca/understanding-the-mdi/dimensions/>), including the [measures of social and emotional development](http://www.discovermdi.ca/understanding-the-mdi/dimensions/social-emotional-development/) (<http://www.discovermdi.ca/understanding-the-mdi/dimensions/social-emotional-development/>).

## ENGAGING OTHERS

Increasing local dialogue on the importance of child well-being in the middle years is an excellent way to start improving outcomes for children. Once you are ready, review your MDI report with multiple audiences: children, parents and elders, caregivers and teachers, school administrators, after-school programmers, local early/middle childhood committees, local government and other community stakeholders. Visit the Discover MDI Field Guide for tips and tools to [widen the conversation and to think critically about the data together](http://www.discovermdi.ca/making-change/sharing/) (<http://www.discovermdi.ca/making-change/sharing/>).

## MAKING CHANGE

The MDI provides opportunities to weave together data and local knowledge to create a change process that reflects the unique context of your school, district or community. The Discover MDI Field Guide's 'Making Change Workshops' support school and community change-makers through the process of facilitating exploration of MDI data, creating action teams and turning ideas into concrete plans. There are full facilitation guides for each workshop, paired with worksheets and companion slide decks. [Explore Approaches to Making Change](http://www.discovermdi.ca/making-change/) (<http://www.discovermdi.ca/making-change/>).

## SHARING DATA WITH CHILDREN

Do the results surprise you or raise further questions? Conversations with children will help explore and clarify results in these areas. Sharing data with children will provide them with an opportunity to share their perspectives and ideas on how to create environments and interactions that help them thrive. If you are wondering how to involve children of all ages and their families in exploring these results, [explore our Tools page](http://www.discovermdi.ca/resources/) (<http://www.discovermdi.ca/resources/>).

## BE INSPIRED AND CONNECT WITH OTHERS

Innovation happens when people build on ideas, rather than simply duplicating them. The Discover MDI Field Guide provides opportunities to learn from seasoned [MDI Champions](http://www.discovermdi.ca/connect/md-champions/) (<http://www.discovermdi.ca/connect/md-champions/>) – check out their stories and learn from their approaches, explore the collection of [downloadable tools](http://www.discovermdi.ca/resources/) (<http://www.discovermdi.ca/resources/>) and [find upcoming training and learning opportunities](http://www.discovermdi.ca/connect/events-training/) (<http://www.discovermdi.ca/connect/events-training/>). Be inspired, edit, adapt or create new!

If you have any additional questions about the MDI project, please visit our website at [earlylearning.ubc.ca/md](http://earlylearning.ubc.ca/md) or contact the MDI team at [mdi@help.ubc.ca](mailto:mdi@help.ubc.ca).

# NEIGHBOURHOOD RESULTS

Neighbourhoods have unique characteristics that provide important context for interpreting MDI results. Understanding neighbourhood-level differences within a school district or community is essential when considering actions to support children’s well-being. The neighbourhood results section includes:

## **Neighbourhood Maps**

- Well-Being Index Map: representing the percentage of children who are “Thriving.”
- Assets Index Maps: representing the percentage of children reporting the presence of each of the four assets of the Assets Index: Adult Relationships, Peer Relationships, Nutrition and Sleep, and After-School Activities.

**Neighbourhood Data Table** – A summary table of the Well-Being Index and Assets Index data.

**Neighbourhood Profiles** – A summary of MDI data based on the neighbourhoods in which children live, including children from all participating public, Indigenous and independent schools. Results are provided for the Well-Being Index, the Assets Index and a selection of questions related to after-school time and community belonging and safety.

Please note that neighbourhood data are reported based on children’s home postal codes and include all children who live within the school district boundaries including children attending Conseil scolaire francophone, Indigenous or independent schools. Where neighbourhoods contain fewer than 35 children, the results are suppressed.

## WELL-BEING INDEX

The MDI Well-Being Index is a composite score of 5 measures that are of critical importance during the middle years. Children who score in the high range on at least 4 of the 5 measures of well-being and have no low-range scores are considered to be “thriving.”

### Percentage of Children Thriving

SD 67

**33%**

All Participating Districts\*

**31%**

 Data Suppressed (<35 students)

\*See page 7 for a list of participating school districts in 2019/20.

Note: Data are mapped using home postal codes, not by where children attend school.

HUMAN  
EARLY LEARNING  
PARTNERSHIP

## ADULT RELATIONSHIPS

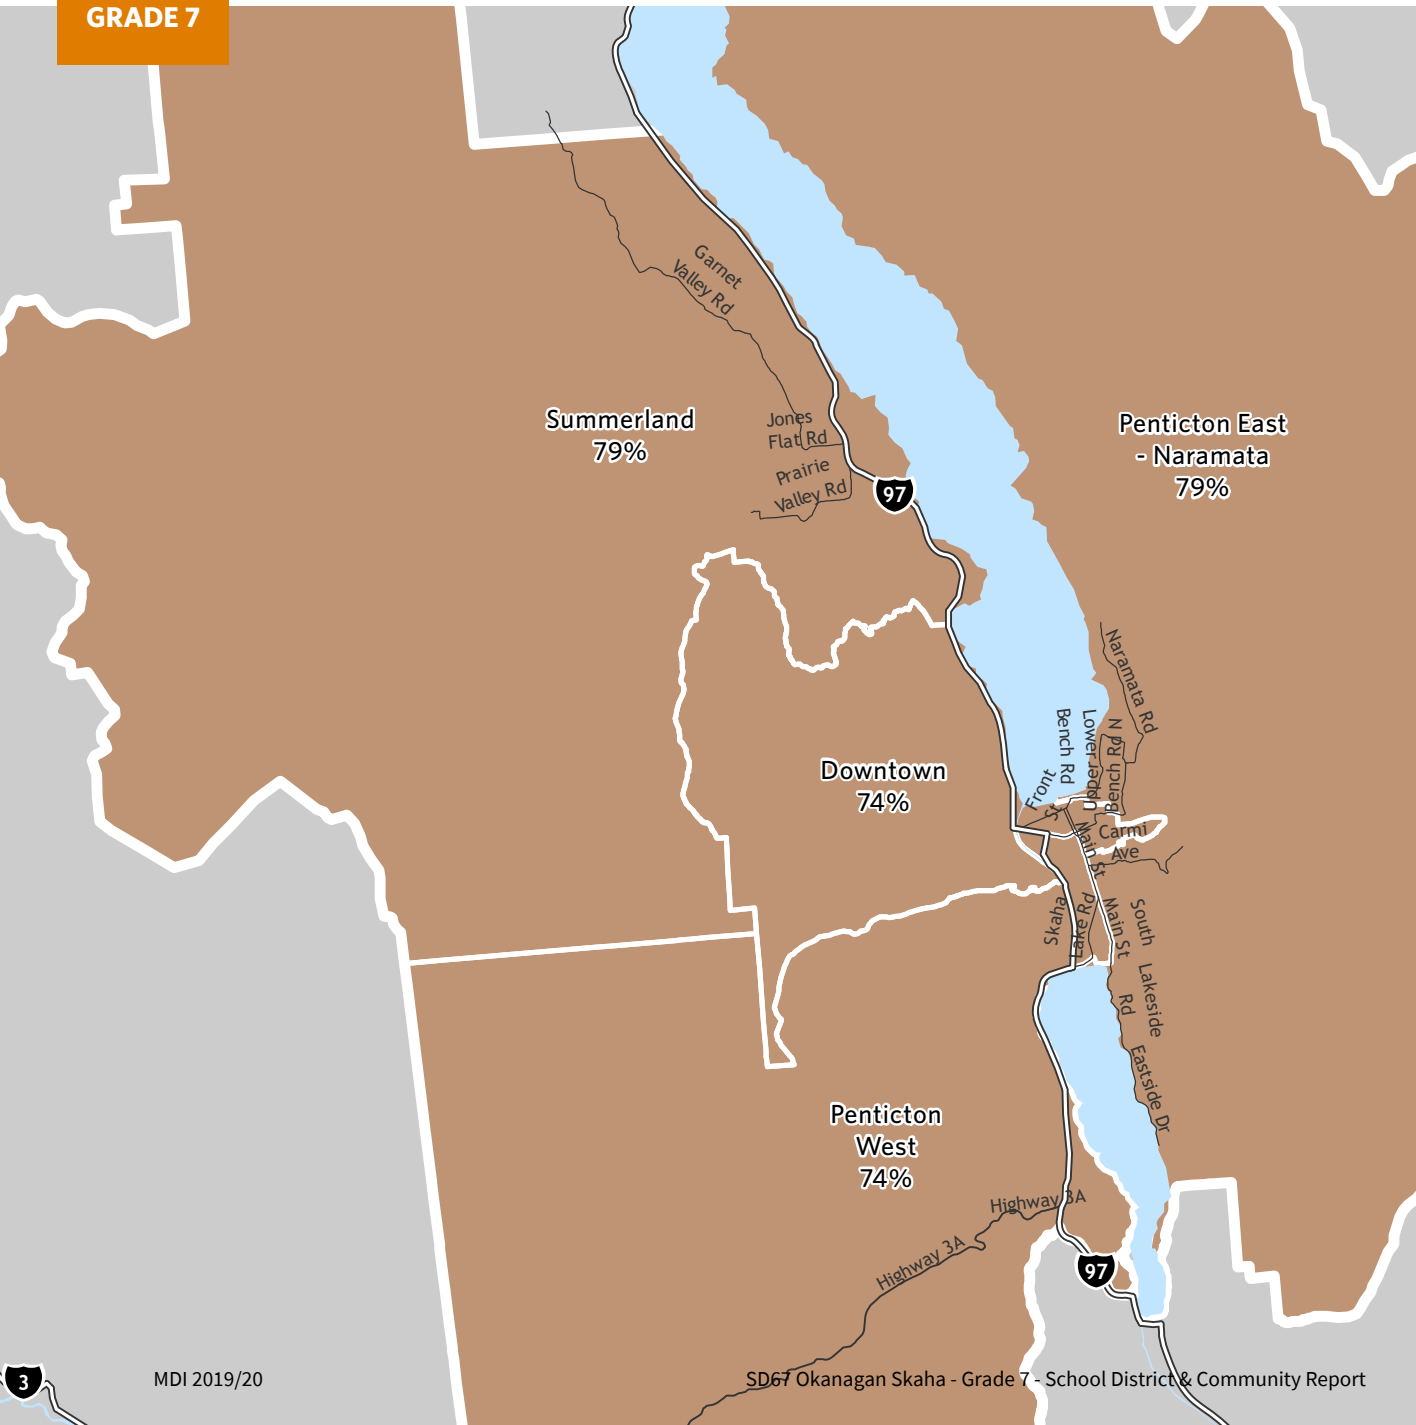

Children's health and well-being are directly related to the presence of adult relationships at home, at school and in their neighbourhood or community.

Percentage of children reporting the presence of the adult relationship asset

90-100%	SD 67
80-89%	<b>73%</b>
70-79%	All Participating Districts*
<70%	<b>72%</b>
Data Suppressed (<35 students)	

\*See page 7 for a list of participating school districts in 2019/20.

Note: Data are mapped using home postal codes, not by where children attend school.

## PEER RELATIONSHIPS

Children's health and well-being are directly related to feeling a sense of belonging with their peers and having close or intimate friendships.

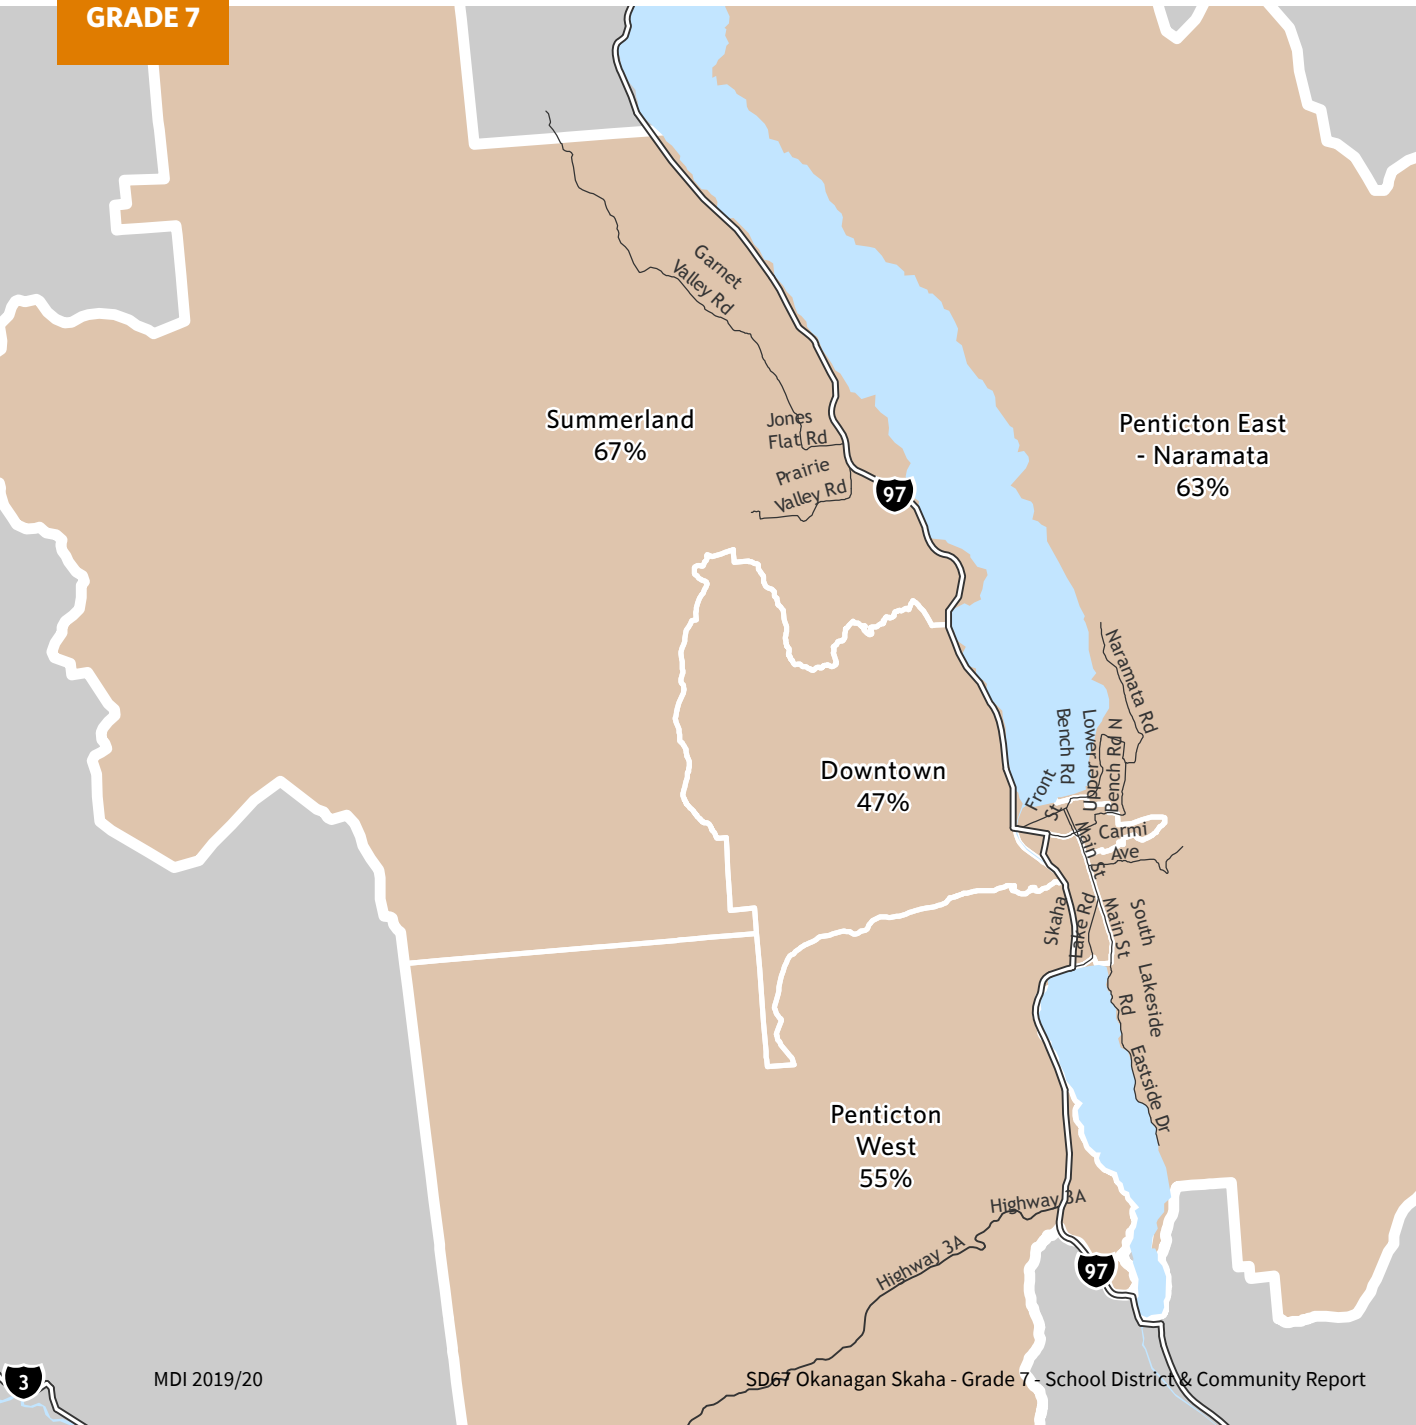

Percentage of children reporting the presence of the peer relationship asset

\*See page 7 for a list of participating school districts in 2019/20.

Note: Data are mapped using home postal codes, not by where children attend school.

## NUTRITION & SLEEP

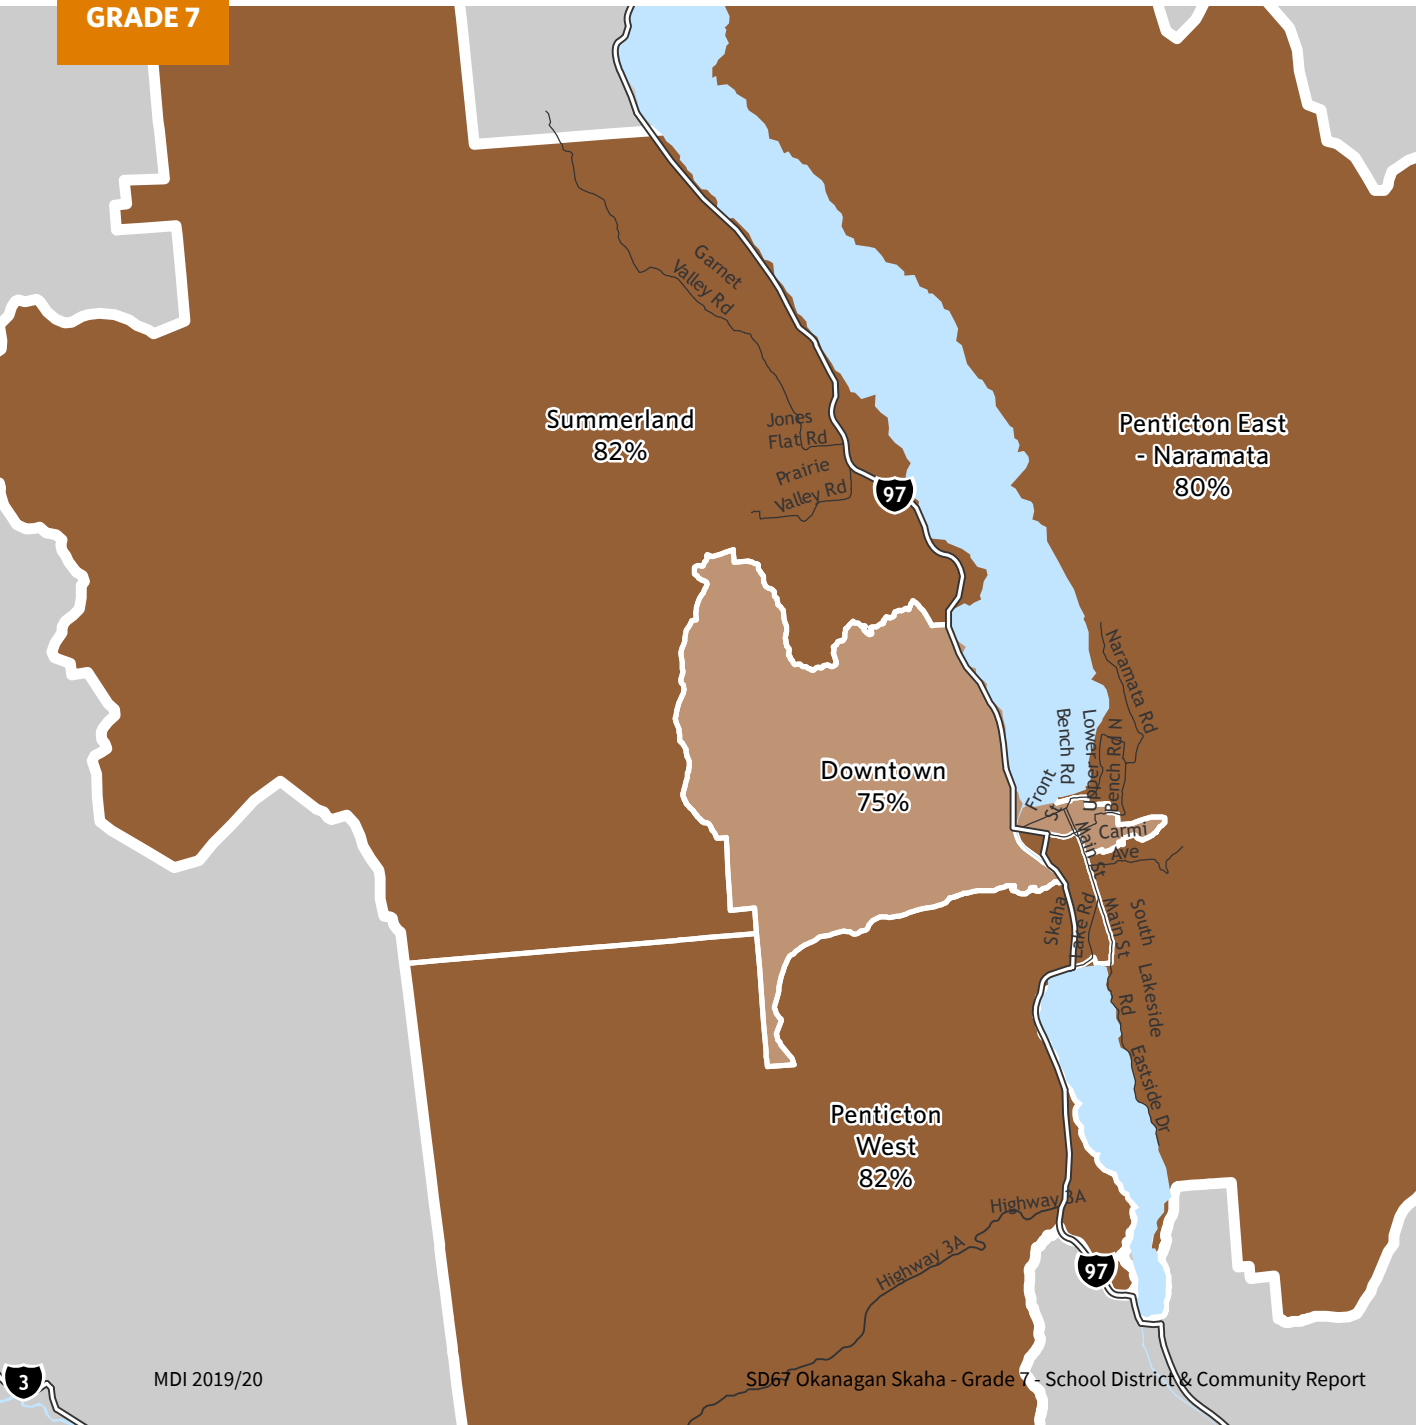

Children's health and well-being are directly related to their nutrition and sleeping habits.

Percentage of children reporting the presence of the nutrition and sleep asset

\*See page 7 for a list of participating school districts in 2019/20.

Note: Data are mapped using home postal codes, not by where children attend school.

## AFTER-SCHOOL ACTIVITIES

Children's health and well-being are directly related to the positive activities they participate in during the after-school hours of 3-6pm.

Percentage of children reporting the presence of the after-school activity asset

\*See page 7 for a list of participating school districts in 2019/20.

Note: Data are mapped using home postal codes, not by where children attend school.

# NEIGHBOURHOOD DATA TABLE

## WELL-BEING INDEX

Percentage of children experiencing:

## ASSETS INDEX

Percentage of children reporting the presence of these assets in their lives:

Neighbourhood	Number of Children	Thriving	Medium to High Well-Being	Low Well-Being	Adult Relationships	Peer Relationships	Nutrition & Sleep	After-School Activities
Downtown	78	36%	22%	42%	69%	74%	47%	75%
Penticton East - Naramata	133	34%	25%	41%	70%	79%	63%	80%
Penticton West	90	32%	28%	40%	72%	74%	55%	82%
Summerland	91	31%	33%	36%	80%	79%	67%	82%
<b>Okanagan Skaha (SD67)</b>	<b>401</b>	<b>33%</b>	<b>26%</b>	<b>40%</b>	<b>73%</b>	<b>77%</b>	<b>58%</b>	<b>80%</b>
<b>All Participating Districts</b>	<b>12,761</b>	<b>31%</b>	<b>27%</b>	<b>42%</b>	<b>72%</b>	<b>79%</b>	<b>58%</b>	<b>82%</b>

**Note:** Neighbourhood data are reported based on children's home postal codes and include all children who live within the school district boundaries including children attending Conseil scolaire francophone, Indigenous or independent schools. Therefore the number of children in all neighbourhoods may not equal the total school district count. MDI results are suppressed where there are fewer than 35 children.

# DOWNTOWN

OKANAGAN SKAHA

NUMBER OF CHILDREN: 78

## WELL-BEING INDEX

DOWNTOWN

OKANAGAN SKAHA

## MEASURES COMPRISING THE WELL-BEING INDEX

| School District Average

### OPTIMISM

Optimism refers to the mindset of having positive expectations for the future. e.g., "I have more good times than bad times."

### SELF-ESTEEM

Self-esteem refers to a person's sense of self-worth. e.g., "A lot of things about me are good."

### HAPPINESS

Happiness refers to how content or satisfied children are with their lives. e.g., "I am happy with my life."

### ABSENCE OF SADNESS

Sadness measures the beginning symptoms of depression. e.g., "I feel unhappy a lot of the time."

## GENERAL HEALTH

Children are asked, "In general, how would you describe your health?"

## ASSETS INDEX

Percentage of children reporting the presence of an asset

## MEASURES COMPRISING THE ASSETS INDEX

### ADULT RELATIONSHIPS

| School District Average

#### ADULTS AT SCHOOL

Assesses the quality of relationships children have with the adults they interact with at school. e.g., "At my school there is an adult who believes I will be a success."

#### ADULTS IN THE NEIGHBOURHOOD/COMMUNITY

Assesses the quality of relationships children have with the adults they interact with in their neighbourhood or community. e.g., "In my neighbourhood/community there is an adult who really cares about me."

#### ADULTS AT HOME

Assesses the quality of relationships children have with the adults in their home. e.g., "In my home there is a parent or other adult who listens to me when I have something to say."

## PEER RELATIONSHIPS

### PEER BELONGING

Measures children's feelings of belonging to a social group. e.g., "When I am with other kids my age, I feel I belong."

### FRIENDSHIP INTIMACY

Assesses the quality of relationships children have with their peers. e.g., "I have a friend I can tell everything to."

## NUTRITION AND SLEEP

### EATING BREAKFAST

Children are asked, "How often do you eat breakfast?"

### MEALS AT HOME WITH YOUR FAMILY

Children are asked, "How often do your parents or other adult family members eat meals with you?"

### FREQUENCY OF GOOD SLEEP

Children are asked, "How often do you get a good night's sleep?"

## AFTER-SCHOOL ACTIVITIES

Children were asked, "During the last week after school (from 3 pm - 6 pm), how many days did you participate in":

### ANY ORGANIZED ACTIVITY

Children who participated in any after-school activity that was structured and supervised by an adult. (e.g., educational lessons, youth organizations, music or art lessons and sports practice)

# USE OF AFTER-SCHOOL TIME

## WHAT CHILDREN WISH TO BE DOING

Children were asked what they want to be doing during the after-school hours of 3 pm - 6 pm:

**I am already doing the activities I want to be doing**

80%

**I wish I could do additional activities**

26%

**I am doing some of the activities I want, but I wish I could do more**

7%

Children who answered that they wish to be doing additional activities were asked to identify one activity they wish they could do and where they would like to do it. Note: responses are grouped into categories for reporting purposes.

# NEIGHBOURHOOD PROFILE 2019/2020 PENTICTON WEST

OKANAGAN SKAHA  
NUMBER OF CHILDREN: 90

## WELL-BEING INDEX

PENTICTON WEST

OKANAGAN SKAHA

## MEASURES COMPRISING THE WELL-BEING INDEX

| School District Average

### OPTIMISM

Optimism refers to the mindset of having positive expectations for the future. e.g., "I have more good times than bad times."

### SELF-ESTEEM

Self-esteem refers to a person's sense of self-worth. e.g., "A lot of things about me are good."

### HAPPINESS

Happiness refers to how content or satisfied children are with their lives. e.g., "I am happy with my life."

### ABSENCE OF SADNESS

Sadness measures the beginning symptoms of depression. e.g., "I feel unhappy a lot of the time."

## GENERAL HEALTH

Children are asked, "In general, how would you describe your health?"

## ASSETS INDEX

Percentage of children reporting the presence of an asset

## MEASURES COMPRISING THE ASSETS INDEX

### ADULT RELATIONSHIPS

| School District Average

#### ADULTS AT SCHOOL

Assesses the quality of relationships children have with the adults they interact with at school. e.g., "At my school there is an adult who believes I will be a success."

#### ADULTS IN THE NEIGHBOURHOOD/COMMUNITY

Assesses the quality of relationships children have with the adults they interact with in their neighbourhood or community. e.g., "In my neighbourhood/community there is an adult who really cares about me."

#### ADULTS AT HOME

Assesses the quality of relationships children have with the adults in their home. e.g., "In my home there is a parent or other adult who listens to me when I have something to say."

## PEER RELATIONSHIPS

### PEER BELONGING

Measures children's feelings of belonging to a social group. e.g., "When I am with other kids my age, I feel I belong."

### FRIENDSHIP INTIMACY

Assesses the quality of relationships children have with their peers. e.g., "I have a friend I can tell everything to."

## NUTRITION AND SLEEP

### EATING BREAKFAST

Children are asked, "How often do you eat breakfast?"

### MEALS AT HOME WITH YOUR FAMILY

Children are asked, "How often do your parents or other adult family members eat meals with you?"

### FREQUENCY OF GOOD SLEEP

Children are asked, "How often do you get a good night's sleep?"

## AFTER-SCHOOL ACTIVITIES

Children were asked, "During the last week after school (from 3 pm - 6 pm), how many days did you participate in":

### ANY ORGANIZED ACTIVITY

Children who participated in any after-school activity that was structured and supervised by an adult. (e.g., educational lessons, youth organizations, music or art lessons and sports practice)

# USE OF AFTER-SCHOOL TIME

## WHAT CHILDREN WISH TO BE DOING

Children were asked what they want to be doing during the after-school hours of 3 pm - 6 pm:

**I am already doing the activities I want to be doing**

71%

**I wish I could do additional activities**

35%

**I am doing some of the activities I want, but I wish I could do more**

6%

Children who answered that they wish to be doing additional activities were asked to identify one activity they wish they could do and where they would like to do it. Note: responses are grouped into categories for reporting purposes.

### WISHES

(Number of Children)

Computer/Video Games/TV	1
Friends and playing	6
Physical and/or outdoor activities	12
Music and arts	6
Time with family at home	4
Work related activities/volunteering	1
Free time/relaxing	0
Learning new things	0
Other	0

## PERCEIVED BARRIERS TO PARTICIPATING IN DESIRED AFTER-SCHOOL ACTIVITIES

Children were asked what prevents them from doing the activities they wish to be doing after school (3 pm - 6 pm):

(Number of Children)

I have no barriers	40
I have to go straight home after school	19
I am too busy	14
It costs too much	16
The schedule does not fit the times I can attend	19
My parents do not approve	4
I don't know what's available	8
I need to take care of siblings or do things at home	5
It is too difficult to get there	12
None of my friends are interested or want to go	14
The activity that I want is not offered	12
I have too much homework to do	10
I am afraid I will not be good enough in that activity	15
It is not safe for me to go	1
Other	14

## AFTER-SCHOOL ACTIVITIES

Children were asked, "During last week AFTER SCHOOL (from 3 pm - 6 pm), how many days did you participate in":

	Not at all	1x /week	2x +/week
Educational lessons or activities	85%	5%	10%
Art or music lessons	60%	13%	27%
Youth organizations	83%	11%	6%
Individual sports with a coach or instructor	69%	10%	21%
Team sports with a coach or instructor	54%	11%	35%
